#1 HEADING - POKER ROOM DB - OVERVIEW

《33》 Elements

Note - the User Guide is written using Developers First App - StudioDB - a screen writing App. That's why the User Guide has a Screen Play Format.

PokerRoomDB - Hosting Poker Tournaments and CashGames - in palm of your hands for your home games/private hosted games.

POKERROOM

1- Create your PokerRoom environment - identify number and types of table in your PokerRoom.

Note - Active Tables should match the Available Tables in your House/Basement/PokerRoom.

Note - From PokerRoom tab - you could send All Upcoming Events, All Upcoming Tournaments or All Upcoming CashGames - with Status Scheduled and Registration Open

TOURNAMENTS

1 - Schedule/Add a Tournament - define all details of your tournament - \$, type, bounty, Re-entry, payout structure, level structure, etc...

Note - When Tournament Status is in Scheduled or in Registration Open - Host can send Invitation - by manually entering Emails - Or by selecting Invitation Group - all Players with active email in the Invitation Group will be added automatically to the Invitation mail

2 - Select an open seat - register a player - add or remove tables as you need - depending on number of Players playing in the tournament.

Note - You can also Register a Player in the Waiting List - this will give you the option to select Random Seating.

3 - Host the tournament - As players are knocked out - remove them from the Tournament - and if the Re-Entry is open - Assign them new seats if they choose to Re-Enter.

4 - Will track every Player - Entry-KO-Re-Entry detail - will calculate Payouts and determine all the Players In-Money. Intelligence built in to guarantee

no double registration for a Player and Only allow Re-Entry when a player is KO.

Note - You can send Player Seating email to all the Players in the Tournament- anytime before or while the Tournament is Active.

5 - Host and Play when your tournament is 1 to 3 Tables - Suggest to have a hosting director to track all tables and open seats and breaking tables when the tournament is 4 to 25 tables (40 to 250 players)

6 - Once the Tournament is completed - view and generate Report of your Tournament.

CASHGAMES

1 - Schedule/Add a CashGame - define all details of your CashGame - Min/Max Buy In Amount - Min/Max Add On Amount.

Note - When CashGame Status is in Scheduled or in Registration Open - Host can send Invitation - by manually entering Emails - Or by selecting Invitation Group - all Players with active email in the Invitation Group will be added automatically to the Invitation mail

2 - Select an open seat - register a player - add or remove tables as you need - depending on number of Players playing in the CashGame.

Note - You can also Register a Player in the Waiting List - this will give you the option to select Random Seating.

3 - As Host - track all Players movement/change Seats - Enter all Player Add Ons - As Player Exit - Enter cashed out Amt. Host using the App will record every player Entry - change seat- add ons - start time - end time.

Note - You can send Player Seating email to all the Players in the CashGame - anytime before or while the CashGame is Active

4 - Once CashGame is completed - view and generate Report of your CashGame (Each Players Buy In - Add Ons - Win/Loss)

POKERROOMDB : MAIN TAB MENU

1: POKERROOM
